

AMOJECT

Injectable Suspension

For Veterinary Use Only

Composition:

Each 1 ml contains:

Amoxicillin trihydrate 150 mg

Gentamycin sulphate 40 mg

Description :

Amoxycilin is a broad spectrum antibiotic and has an effects similar to Ampicillin .

Its effects is by analyzing the synthesis of the cell wall .

Gentamycin is a broad spectrum antibiotic affects a variety of Gram positive and Gram negative micro-organisms, so it's effective in most common infections especially respiratory and uro-genital ones and in cases of bacterial septicemia .

The association of gentamycin and amoxicillin, will allow them to act synergistically making this product to have a high bioavailability, reaching long lasting therapeutical concentrations in blood .
