

ICHTHYOL

Ointment

Composition:

Each Pack of 100 g contains:

Salicylic acid	5 g
Camphor	2 g
Ichthammol	10 g

Description:

Ichthammol activates the blood flow in the infected area especially in cases of abscesses and light lameness

Salicylic acid has a sedative action by affecting the nerves endings in the skin, it also softens the corneous cells.

Camphor has a sedative and anti-itching action.

Indications:

- not open fistula
- fibrosis of soft tissues
- lameness
- abscesses
- used as a sedative drug

Usage and Dosage:

For external use only

Wash the infected area with tepid water then dry and apply the ointment by finger with light massage into the area daily, the treatment should be continued till recovery.

Storage conditions:

Store in airtight containers, in a moderate temperature (15-25 C) and protect from direct sunlight.

Packing:

Pack of 100 g.
