

K3 Liquid

Oral Liquid

Composition: each 1ml contains:

Menadione Sodium Bisulfite (Vitamin K3) 130 mg

Description:

Vitamin K3 is needed primarily for the blood clotting mechanism that protects from external bleeding and internal bleeding.

Vitamin K3 is essential for the synthesis of prothrombin, a protein that converts soluble fibrinogen circulation in the blood into an insoluble protein called fibrin, which is the major component of a blood clot.

Indications:

- Newborn animals and chicks.
- Coccidiosis .
- Gumboro .
- Bleedings .
