

## **MONOZIL**

### **Oral Suspension**

**Composition:**

each ml contains:

Albendazol 50 mg

Niclosamide 35 mg

**Description:**

Albendazole is a broad-spectrum anthelmintic, active against infections with gastrointestinal roundworm, lungworms and tapeworms.

Albendazole is also active against adult liverfluke.

Albendazol affects the glycogen metabolism and decrease carbohydrates level in the parasite and stops the oxidation process leading to its death.

Niclosamide affects the parasite's cell by locking the Crip ring in the tape worms leading to accumulating of Lactic acid and then the death of the Parasite .

**Indications:**

Gastrointestinal nematodes: larval and adult stages of Haemonchus, Ostertagia, Trichostrongylus, Nematodirus, Cooperia Bunostomum; adult stages of Oesophagostomum, Chabertia and Strongyloides.
