

NEOPEN

Intramammary Injector

Composition :

Each injector of 10 g contains :

Neomycin Sulphate 200 mg

Description :

Neomycin is an antibiotic which has a strong bactericidal effect against the most Gram-positive and Gram-negative bacteria.

Neomycin act includes the inhibition of the synthesis of protein of the microbe cell .

Indications :

NEOPEN is indicated for treatment of mastitis caused by micro-organisms, susceptible to neomycin, in cows, ewes, mares, and she-camels.

Usage :

For intra-mammary treatment

Evacuate the udder completely.

Wash the udder and teats thoroughly with warm water containing suitable disinfectant, then infuse the content of the injector in the infected quarter or half, then massage the whole udder to allow the medicine to go through the milk ducts .

Dosage :

Cows, she-camels and mares : 1 injector in the infected quarter or half, twice daily, for 3 days .

Ewes: half injector in the infected half twice daily, for 3 days

Withdrawal period :

Meat: 7 days, Milk: 3 days.

Storage conditions :

Store in airtight containers, in a moderate temperature (15-25 C) and protect from direct sunlight.

Packing :

injector of 10 g.
