

SELAVIT
Injectable Solution

Composition :

Each 1ml contains:

Vitamin E Acetate 100 mg

Sodium Selenite 1.5 mg

Description :

Combination of Vitamin E with Selenium seems to be essential at the end of pregnancy and in newborn animals. Vitamin E deficiency together with a deficiency in trace elements, particularly Selenium may result in muscular dystrophy. Vitamin E together with Selenium is necessary for a normal metabolism of proteins and energetic nutrients.

Indications :

- vitamin E deficiency and / or Selenium deficiency, especially in poultry, lambs and calves .
- white muscle disease which leads to muscle dystrophy .
- to improve fertility .

Usage :

For intramuscular injection

Dosage :

Calves : 2-3 ml per 50 kg of body weight

Lambs : 0.5 – 1 ml per 25 kg of body weight

Storage conditions :

Store in airtight containers, in a moderate temperature (15-25 C) and protect from direct sunlight .

Packing :

Vial 100 ml and 50 ml .
