

STREPTOFLOXACIN

Water Soluble Powder

Composition :

Each sachet of 100 g contains

| | |
|-----------------------|--------|
| Enrofloxacin | 12.5 g |
| Streptomycin Sulphate | 10 g |
| Vitamin K3 | 0.3 g |
| Vitamin B1 | 0.5 g |
| Vitamin C | 0.5 g |

Description :

Enrofloxacin belongs to the group of fluoroquinolones and acts bactericidal against both gram-positive bacteria and gram-negative bacteria. It is also active against Mycoplasmas.

Streptomycin is an aminoglycoside with a bactericidal action against mainly Gram-negative bacteria like E. coli, Klebsiella, Pasteurella, Salmonella and Staphylococcus .

Vitamins are essential for the proper operation of several physiological functions.

The combination of the two materials with the vitamins results in a highly effective remedy of a broad-spectrum against the most bacteria species .

Indications :

STREPTOFLOXACIN is indicated in poultry for the treatment of :

- CRD with E-coli infection
- Infectious Coryza
- Avian typhoid
- Pasteurellosis

Usage :

Oral with drinking water

Dosage :

100 g per 100 liter of drinking water .

Withdrawal period :

Meat : 3 days Eggs : 2 days.

Storage conditions :

Store in airtight containers, in a moderate temperature (15-25 C) and protect from direct sunlight

Packing :

Sachet of 100 g .
